Summary

Full-stack engineer with over 10 years of experience in software development and systems analysis, proficient in several agile technologies and methodologies. I have led activities in CRM platforms and developed Low Code tools. Significant contributions to scalable web systems using Ruby on Rails, JavaScript, Node, React, PHP and Go. Experienced in automated testing and design patterns to ensure system maintainability. Proficient in Kanban and Scrum, contributing to the success and efficiency of the project.

Hard Skills

- Ruby on Rails; React & React Native; Node.js (TypeScript/NestJS); PHP; Python; Golang; C#;
- PostgreSQL, MySQL, Oracle; Prisma; Firebase; MongoDB; Supabase; REST/GraphQL;
- Docker; CI/CD; AWS/GCP; KYC/MFA integrations; Automated Testing (RSpec, Jest);
- Accessibility (WCAG).

Soft Skills

Proactivity, Ownership, Empathy, Resilience, Teamwork, Clear Communication, Mentoring.

Others

- English Level B2;
- Published Android apps on Google Play (React Native, Supabase, Firebase and API):
 - FIInvest — REIT/FII tracker with analytics and alerts.
 - PrazoGuard — subscription & warranty tracker with smart reminders.
 - Moeda Rápida — currency converter with offline cache and rate insights.
 - Lista Combinada — shared grocery list app for private groups (invite-based).
 - Imovel Gestor — Managing properties in an organized and secure manner.
 - Coz.IA — from photo to recipe with step-by-step guidance.

Education

- MBA in Web 3.0 — Descomplica Digital University (2024–2025)
- MBA in Information Security — Descomplica Digital University (2023–2024)
- Post-graduate: Forensic Expertise & Digital Forensics — FTA (2022–2024)
- Graduate in Analysis and Systems Development — Estácio/CE

Professional Experience

Full-Stack Developer — LBC, via WireIT (Remote, Lisbon, PT) — Apr 2026 – Present

- Developing and enhancing large-scale government platforms using C#, Java, React and Node.js).
- Driving accessibility compliance (WCAG/AMA), code quality initiatives, automated testing and application modernization.
- Implementing IAM solutions with Microsoft Entra ID (Azure AD), RBAC and secure authentication / authorization flows.
- Supporting CI/CD pipelines, operational monitoring and Power BI analytics for data-driven decision making.

Tech Lead — Revenya, via PrimeIT (Porto, PT) — Sep 2025 – Apr 2026

- Leading architecture and delivery of a fintech/investments platform for MENA (REITs/wallets).
- Designed multi-repo setup (Next.js, NestJS) with Postgres/Prisma and React Native app.
- Implemented auth (Supabase/Google), KYC (Sumsb), MFA/OTP; integrated Zoho CRM and NymCard.
- Established CI/CD and cloud foundations (AWS Lambda/S3/RDS).
- Built a risk & fraud scoring service in Python (FastAPI), streaming events with Kafka and exposing simple REST APIs with human-readable scores.
- Automated KYC flows in Python: handled Sumsb webhooks, processed ID/selfie checks, ran background tasks, and kept only the minimum PII with full audit logs.

IT Consultant / Full-Stack Developer — AICEP, via PrimeIT (Lisbon, PT) — Apr 2025 – Sep 2025

- Improved www.portugalexporta.pt, MyAICEP and MyAICEP Staff portals under GCP (GKE/Docker).
- Delivered features and bug fixes across React front-end and .NET Core/GraphQL back-end.
- Ensured AMA Silver accessibility compliance and streamlined CI/CD pipelines.

Systems Analyst — IntraPoint AS (Remote, Norway/Brazil) — Jul 2022 – Jul 2024

- Designed and developed low-code CRM/workflow modules used by enterprise clients.
- Built services with Python, PHP and Node.js; data layer with MongoDB and PostgreSQL.
- Owned sprints with Jira/Confluence; coordinated backlog with product stakeholders.
- Implemented automated tests and improved performance of critical endpoints.

Additional Experience

- Full-Stack Developer — Cresce Vendas (Jul–Aug 2024): E-commerce features with React + Rails; testing with RSpec/Jest.
- Systems Analyst — Controladoria Geral do Estado (CGE) (Sep 2021–Jul 2022): Rails/React; scalable internal systems.
